
The best way to find out how to work around an issue would be to study the particular model, and see if there is a fix for it. If not, try using alternative methods of fixing the issue. For example, many people have had trouble successfully ripping CDs or DVDs by using software such as Nero or Windows Media Player. The best alternatives are free programs such as Free Audio Converter and Ashampoo Music Converter. You can also use CDex or Easy CD Creator instead of Nero to make your job easier. The same holds true with DVDs- you can either use Windows Media Player, which is free with Windows 7, or another program like DVD43 which is available for no charge at <http://www.divxatope.com/en/download-dvd43.html>.

Since being posted in September 2009, this article has received over 50,000 hits! However, the only complaint that I have received is that the article is too short, and therefore not enough information is given in it. This is actually a very good thing for me because it means that I have covered all of the important information in just a few paragraphs! However, if you would like to receive more information about these issues and more topics related to them, feel free to sign up for my newsletter at <http://www.robertkendalltaylor.com/newsletter-signup> or at <http://www.facebook.com/robertkendalltaylor>.

All of the articles that I have written for my blog can be found on my website at <http://www.robertkendalltaylor.com>, and can be found on Facebook at <http://www.facebook.com/robertkendalltaylor>.

This blog does not provide legal advice, and it is purely a personal opinion of mine regarding these issues. If you have any further questions or would like some legal advice, feel free to contact me through my website or through Facebook!
